Agricultural.

A great variety of small work will now have been brought to a close, and it remains to gather up the fragments, that nothing be lost, of all this good provision for the wants of man and beast. Many small crops will be ready for the hand of the husbandman from time to time: the lifting of early potatoes, the working up of early apples—from which you get the best of older for vinegar, the sowing of the melons, the laying down of cucumbers for pickles—which is always done from the first flush, bearing of the vines, the drying of green sweet corn, berries, the drying of green sweet corn, berries, peaches, etc., the canning or pickling of peaches, etc., the canning or pickling of fruits, for mercy's sake don't make the old-fashioned plum preserves and the like by a dose of which at a country tavern we were slightly killed last 4th of July.] and thus by a little prudent foresight

the whole circle of the year. Besides a'l these light I turs which de mand immediate execution, the fall work begins to loom up on the horison. First is the putting in of the fall wheat, of which we wrote, more particularly in our last No. There was something curious, after all in this last barvest. The fact is we believe that nature is in league with her dependencies, and where the cunning of man undertakes to circumvent the mu tual understanding between the two, the party of the first part tips a wink to the party of the second part, to be on hand at the right time—suffer or later as the case may te-so that when the f rmer gets an extra early wheat and puts it in extra early, for the purpose of eneming the rascalsoon finds out the cheat, and goes to bed STONEBURNER JEFFRIES & Co. ly midge of his brakfast the rescally midge earlier or takes a shorter nap, and so bewhite. This early dodge may win for a white such a rest lower than any other sadding white, but the midge has already gained to week upon his former enterprising habits, and will some come to time with the fastest wheat that dere grow. In Some of the midgs favested districts of this state—for instance in Pickaway and Ross.

We heard of many fields that a rand the we heard of many fields that e caped the midge almost entirely, from being later than the majority. Eternal vigilance is the price of good wheat as well as the price of liberty while the price of the Good year-cheaper to clubs! Now is a good time to sort over the

sheep flocks, and take out such as should be put to fatten. There may be ewes that have not proved good nurses of lambs or do not bear a good fleece, others that are getting to old to be safe for winter, and others which for any cause should not be kept longer; these should all be sorted out and put upon high keeping to be fattened for home use or for sale. The same should he done of cows-young cows that do not milk or breed well, old cows that have out lived their active usefulness etc., should

foed for fattening.

This is also the right time to cut a ditch for draining any cat swamps or wet spots which you desire to bring into cultivation: these spots are the best purt of the farm, when once they are brought under control. At this time, our suthern valley farmers are reserving a range for the winter pasture for their sheep, and the the winter pasture for their sheep, and the fine carpet of this luxuriant summer's H. L. CRIDER, LANCASTER, OHIO. Orders Solicited for the following Articles have been proved by analysis to growth, promises an abundant nibble, when the saows shall spread their protecting blanket over it .-- [Cultivator.]

Hints of the Season.

HEALTH AND CLEANLINESS .- Many farmers will, during the fall months be thrashing their grain. This work, however performed, is not very agreeable; a good machine managed by energetic and careful men should always be choses. Have a suf ticient number of able-bodied men to assist, so that none shall be obliged to labor sonecessially hard. Persons not in good health, or those inclined to diseases of the throat and lungs should not labor in the dust created by a threshing machine, as it merchant ration, is irritating to the lining membrance of merchant ration, dust created by a threshing machine, as it the air passages, and may produce serious injury. A moistened sponge tied over the should always be used by those most exposed. All means for obtaining abundance of freely and the removal of that which be manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities, which he manufacturers to order to be a qualities. nostries to prevent the entrance of dust, of fresh air, and the removal of that which becomes loaded with impurities, should be THE LITTLE GIANT taken. Furnish labors with plenty of wholesome food and drink. If the weather is warm, nothing is more grateful to thrashers than those fruits which contain Summer Dry Goods, acids and water. Take good care of the straw by neatly stacking, or what is better, place it under cover that it may be led out in winter, or used for bedding or mulching. Cut straw and meel makes the LACE DO., SILK LACE, best of feed for all kinds of stock, and it becomes available much sooner for ma nure, when used in this way. See that your grain is well secured from rats, mice and chickens, as they often waste much and make what they do not was e more or less filthy. When you are through, take a good bath, to remove all dirt from the surface of the body, and allow the pores to act healthfully. [We can urge on far mers the necessity of changing shirts every night before going to bed. A majority of farmers never bathe, and four fifths never use a night spirt. Baths, and clean linen to sleep in, are healthful luxuxies that cost nothing] If the nostrels are stopped up, snull topid water into them slowly, and blow it away with force. It these bints are followed, threshing will not be very unp'easant work.

HARD BUTTER WITHOUT ICE .- To have hard butter in summer, without ice, put an ironing cricket or any open flat thing with legs, in a small milk pan, put on this Lancaster, May 21, 1866-132 cricket a plate of butter, fill the bottom of the pan with water, turn a common flower H.B.&J.A.HUNTER. pot or earthern crock upside down over the butter, so that its edge shall be within the pan and under the water, plug the hole of the flower pot with a cork, then dreach the pot with water; set in a coolplace until morning, or if done in the Drugs, Medicines. Paints, Olls, Byemorning, the butter will be very hard by supper time.

HOSTETTER'S STOMACH BITTERS.

The proprietors and manufacturers of HOS-TETIER'S CELEBRATED STOMACH B'T-TER'S can appeal with perfect confidence to physicians and citizens generally of the United States, occause the article has attained a repu-tation heretofore unknown. A few facts upon this point will speak more powerfully than volumes of bare assertion or biszoning puffery. The consumption of Hostetter's Stoniach Bit-ters for the last year amounted to over a halfmillion bottles, and from its manifest steady increase in times past, it is evident that during the coming year the consumption will reach near one million bottles. This immense amount could never have been sold but for the rare medicinal properties contained in the prepara-tion, and the sanction of the most prominent physicians in those sections of the country where the article is best known, who not only recommend the Bitters to their patients, but are ready at all times to give testimonials to its efficacy in all cases of stomachic derangements

and the diseases resulting therefrom.

This is not a temporary popularity, obtained by extraordinary efforts in the way of trumpeting the qualities of the Bitters, but a solid estimation of an invaluable medicine, which is

destined to be as enduring as time itself.

Hostetter's Stomach litters have proved Godsend to regions where fever and and various other bilious complaints have counted their victims by hundreds. To be able to state confidently that the "Bitters" are a certain cure for the Dyspepsia and like diseases, is to the proprietors a source of un-alloyed pleasure. It removes all morbid matter from the stomach, purifies the blood, and imparts renewed vitality to the nervous system, giving it that tone and energy indispensable for the restoration of health. It operates upon the stomach, liver, and other digestive organs, mildly but powerfully, and soon restores them to acondition essential to the healthy discharge

of the functions of nature.

Elderly persons may use the Bitters daily as per directions on the bottle, and they will find in it a stimulant peculiarly adapted to comfort declining years, as it is pleasant to the palate, invigorating to the bowels, excellent as a tonic, and rejuvenating generally. We have the evi-dence of thousands of aged men and women who have experienced the benefit of using this preparation while suffering from stomach de-rangements and general debility; acting under rangements and general dentity, acting inder the advice of physicians, they have abandoned all deleterious drugs and fairly tested the merits of this article. A few words to the gentler sex. There are certain periods when their cares are so harassing that many of them sink under the trial. The relation of mother and child is so attentingly tender, that the mother, especially if she be young, is apt to forget her own health in her extreme anxiety for her infant. Should the period of maternity arrive during the summer season, the wear of body and mind is generally aggravated. Here, then, is a necessity for a stimulant to recupe-rate the energies of the system, and enable the mother to bear up under her exhausting trials and responsibilities. Sursing mothers gene-rally prefer the Bitters to all other invigorators that receive the endorsement of physi-cians, because it is agreeable to the taste as well as certain to give a permanent increase

of Rodi'y strength.
All those persons, to whom we have particularly referred above, to wit: sufferers from fever and ague, caused by malaria, diarrhoca, dysentery, indigestion, loss of appotite, and all diseases or derangements of the stomach, superannuated invalids, persons of sedentary compation, and nursing mothers, will consult their own physical welfare by giving to Hostetter's Celebrated Stomach Bitters a trial.

CAUTION.—We caution the public against using any of the many imitations or counterfield, but sale for Hosterter's Centennation. feits, but ask for Hostetten's CREEBRATED STORACH BITTERS, and see that each bottle has the words "Dr. J. Hostetter's Stomach Bitters" blown on the side of the bottle, and stamped on the metallic cap covering the cork, and observe that our autograph signature is on the
